JEWELRY PHOTOGRAPHY GUIDE

Mar 04, 2021

[Jewelry Photography Guide](#)

Jewelry photography is a notoriously difficult process. The gems are highly-reflective, the pieces are commonly small, and colored stones don't appear as vibrant in photos as it is in reality. For instance, emeralds can come out looking like tourmaline in photographs when its components react to the chromium in the film.

Best Lens for Jewelry Photography? For web images, the 18-55mm lens that is included with your camera kit is sufficient for almost all products. In most cases, you don't need a macro lens or any additional lenses. For smaller pieces like rings or small studs, a macro lens will give you a better quality picture in a bigger size. However, images used on the web don't need to be too big so ...
