The International Fixed Calendar (also known as the Cotsworth plan, the Cotsworth calendar and the Eastman plan) is a solar calendar proposal for calendar reform designed by Moses B. Cotsworth, who presented it in 1902. It divides the solar year into 13 months of 28 days each. It is therefore a perennial calendar, with every date fixed to the same weekday every year.

What I want is for the where clause to capture the last 13 months of full data. Examples: Today is 1/30/2015, if executed the query would return records from 12/1/2013 to 12/31/2014. Today is 2/06/2015, if executed the query would return records from 1/1/2014 to 1/31/2015. The query will include those dates falling on the first and last days of the month. The code I have is as follows: WHERE ...
